Rocks Slam Dunk with NSDesign

SCOTLAND'S only professional basketball team has scored a slam dunk with web designers NSDesign.

The Scottish Rocks have renewed their partnership with Hillington-based company, which worked with the team on its website last season.

NSDesign, which has recently been nominated for two prestigious business awards, will continue to manage the Rocks' site and provide them with e-commerce support and web-hosting.

Managing Director, Gary Ennis said:

"I am delighted to announce that we have renewed our partnership with the Rocks and will continue to support them with web management and e-commerce solutions.

"I have been a Rock's fan for years and have a real passion in seeing them progress. Unfortunately we didn't get off to the best start with The Rocks losing to the Everton Tigers on Sunday but there is a long way to go in the season!"

The Rocks will be competing from their new base at the Kelvin Hall this season accompanied by the Rockettes dancers.

Sarah Bell, Senior Commercial Manager for the Rocks was also delighted to renew the partnership. She said:

"Following NSDesign's fantastic work on the Rocks site last season we will continue to work with them on all aspects of web business and marketing where their expert advice and support has become invaluable."

About NSDesign

NSDesign has been helping businesses and organisations maximise their success online since 1999, and is now based at the award winning Hillington Park Innovation Centre.

The company designs innovative products and services that allow their clients to do things better on the web, ranging from initial domain name registration and web hosting, to custom web development, ecommerce systems, internet marketing and training, and deliver these solutions to a range of clients from start-up companies to government bodies and universities.

The focus is strongly on accessibility and usability, providing the tools to empower users with full control over their account, backed by in-house expertise to rely upon when required.
